Introduction:

Report Overview:

The HR performance report is designed to delve into the intricacies of employee performance within the organization, aiming to uncover key factors influencing performance and potential areas for improvement. Through a series of visualizations, the report offers a comprehensive analysis of performance distribution, examining how different factors such as company, department, gender, salary, and tenure impact employee performance.

Conflict Scenario:

A challenge arises in understanding and resolving the factors influencing performance disparities within the organization. Despite ongoing efforts to support employees, a substantial portion has been categorized as **needing improvement** in their performance evaluations.

Approximately **21%** of the total workforce falls into the "**Need Improve**" category, highlighting a significant concern for organizational leaders and HR professionals. This indicates potential barriers preventing these employees from achieving their best performance.

Let's investigate!

Visualizations Overview:

[Interact with dashboard here](https://t.ly/MIUMk) or copy the link <https://t.ly/MIUMk>

Overall Performance Distribution:

- Provides a clear depiction of the distribution of performance appraisal grades across the organization, highlighting the proportion of employees in each grade. Here we can see clearly that 31 employees in the Need improve Category which is 21% of the total employees.

Performance Distribution by Company:

- Offers insights into the performance distribution between the Three companies, enabling comparisons to identify that the ELAMCO and GTECH have the high number of employees they Need Improve. GTECH has the lowest number of employees they ranked as Outstanding at 3 Employees.

Performance Distribution by Department:

- Analyzes performance within each department to identify areas of excellence and areas needing improvement, helping to focus targeted interventions.

Gender-based Performance Analysis:

- Explores performance disparities based on gender, shedding light on Females. They have the lowest percentage at 4% of employees ranked as Need Improve and on the other side men has the highest percentage at 17%.

Salary vs. Performance Category:

- Examines the relationship between gross & net salary and performance grades to understand whether compensation influences employee performance. Here the employees ranked as Need Improve have the second high salary and the other who's ranked Outstanding have the lowest salary.

Tenure vs. Performance Category:

- Tracks the performance trends over employee tenure, providing insights into how experience within the organization correlates with performance levels.

Conclusion:

- the ELAMCO and GTECH have the high number of employees they Need Improve. GTECH has the lowest number of employees they ranked as Outstanding at 3 Employees.
- Females have the lowest percentage at 4% of employees ranked as Need Improve while men have the highest percentage at 17%.
- the employees ranked as Need Improve have the second high salary and the other who's ranked Outstanding have the lowest salary.

Recommendations:

Root Cause Analysis: Understanding the underlying reasons for subpar performance among a sizable portion of employees. This may involve investigating factors such as skill gaps, inadequate training, poor work-life balance, or ineffective leadership.

Performance Evaluation Criteria: Evaluating the fairness and effectiveness of the performance appraisal process to ensure it accurately assesses employees' contributions and potential areas for improvement.

Support and Development Programs: Implementing targeted interventions such as training programs, mentorship initiatives, or performance improvement plans to support employees in enhancing their skills and addressing performance gaps.

Organizational Culture: Assessing the organizational culture and leadership practices to determine if they are conducive to employee engagement, productivity, and growth. Addressing any cultural issues or deficiencies that may be contributing to performance challenges.

Equity and Inclusion: Ensuring that performance evaluations are conducted fairly and without bias, taking into account factors such as diversity, equity, and inclusion. This involves promoting a culture of transparency, accountability, and equal opportunity for all employees.

By acknowledging and addressing the conflict surrounding performance disparities within the organization, stakeholders can work towards fostering a more equitable, supportive, and high-performing workplace environment, ultimately driving organizational success and employee satisfaction.
